DATA SHEET

for

Snow-making systems

DATA SHEET for a non-binding Cost calculation

SNOWING AREA

in m² / ha

Water for snow production

..... m³

Water factor m³ - snow m³

1 m³ water = m³ snow

Pump stations

pcs.

Snow lances

pcs.

Snow cannons

pcs.

Snow groomer

pcs.

Snow groomers - Skidoo

pcs.

Photovoltaic system

pcs.

From the data given to us by you, we are able to calculate a guideline for the ERSO installation-components needed for a standard snowing project for each snowing-site. These can vary regarding the amount of units, depending on your special requirements and are specifically calculated and offered after an onsite project evaluation of your facilities.

All prices are ex VAT, ex work, and ex installation travel.

General terms and conditions are implied from the company ERSO Technology LTD
